

# AUCCCD

Association for University and College  
Counseling Center Directors

## Annual Survey: 2020

Reporting Period: July 1, 2019 through June 30, 2020

Kimberly S. Gorman, Ph.D.  
Director, Counseling and Psychological Services  
Western Carolina University

Cindy Bruns, Ph.D.  
Director, Counseling Services  
Central Washington University

Calvin Chin, Ph.D.  
Director, Counseling and Psychological Services  
Princeton University

Nivla Y. Fitzpatrick, Ph.D.  
Director, Counseling Center  
Pepperdine University

Linda Koenig, Ed.D.  
Director, Counseling, Health & Accessibility Services  
Shawnee State University

Pete LeViness, Ph.D.  
Director, Counseling and Psychological Services  
University of Richmond

Karen Sokolowski, Ph.D.  
Director, Counseling and Psychological Services  
University at Albany

## EXECUTIVE SUMMARY

A total of 477 counseling center directors responded to the 2019-2020 AUCCCD survey.

Throughout this report, the impact of COVID-19 on counseling center services will be emphasized. Many counseling centers began to shift service delivery in mid-March 2020 as colleges and universities moved to on-line instruction. Thus, this report uses March 15, 2020 as the last date of routine service delivery. Any comparisons for services because of COVID use July 1, 2019 to March 15, 2020 as the time in which routine services were provided and March 16, 2020 to June 30, 2020 as the time period in which services were shifted because of COVID.

### Telehealth Services

Counseling centers had to transition quickly to providing tele-mental health services. In the 8.5 months prior to March 15, 2020, counseling centers averaged 17.1 video sessions as compared to an average of 1164.8 sessions from March 16, 2020 to June 30, 2020. This is a 6811% increase.

### Counseling Services Impact

Counseling services improve retention and student academic performance. Counseling centers are clearly serving as "high impact practices" that help keep students engaged in and retained by their institutions:

- (1) Counseling services have a positive impact on academics: 67.9% of clients stated that counseling services helped with their academic performance.
- (2) Counseling services have a positive impact on retention: 58.4% of clients stated that counseling services helped them stay in school.

### Counseling Center Staffing

Institutions continue to invest additional resources in counseling services: 31.6% of centers gained staff positions, while 13.8% lost staff positions.

Changes in FTE were more commonly reported for the period prior to the COVID-19 pandemic. 37.4% of schools had a change in the number of FTE's between July 1, 2019 and March 15, 2020 while 26.1% had a change between March 16, 2020 and June 30, 2020.

Changes in FTE during the pandemic were more common than furloughs, even though they increased during the pandemic, as 14.1% of centers experienced furloughs from March 16, 2020 to June 30, 2020 as compared to 0.9% prior to the pandemic.

### Presenting Concerns

Anxiety continues to be the most frequent concern among college counseling center clients at 59.2%, followed by depression (46.5%), stress (42.8%), family concerns (27.4%), specific relationship problems (25.2%), academic performance difficulties (25.1%), sleep disturbance (16.6%), social isolation / loneliness (16.4%), adjusting to a new environment (16.1%), trauma (15.4%), eating/body image concerns (13.0%), and suicidal thoughts (11.7%).

### Demand for Services

COVID had an impact on service delivery as 58.3% of directors reported experiencing a decreased demand for counseling services in the past year. While it is unknown what the demand would have been without COVID, 79.0% of the total number of individual appointments in 2019-2020 were delivered before March 16, 2020.

Directors reported that, on average, 6.4% fewer clients were served in 2020 than in 2019. Similarly, centers offered, on average, 5.7% fewer appointments in 2020 as compared to 2019.

The most frequent strategies centers used to manage client demand are: triaging clients based on urgency (48.2% reported this strategy), scheduling clients every two weeks (38.6%), offering more groups (30.4%), and reducing outreach activities (30.4%).

Directors reported, on average, 13.0% of their campus served by the counseling center. Counseling centers at smaller institutions tend to serve significantly greater percentages of their entire student population.

### Stepped Care

45.7% of counseling centers used a version of stepped care, which refers to offering a campus-wide menu of service options ranging from no care at all to weekly therapy at the counseling center. This is an increase from the 2019 report in which 37.2% of centers reported using stepped care.

Depending on the center, options may include appropriate forms of self-help, wellness coaching, support groups, mindfulness classes, appropriate apps and online resources, etc. A stepped care model was much more likely to be used at the largest centers (as high as 83.3%) than at the smallest centers (as few as 17.4%).

### Case Managers

54.5% of centers have one or more staff who provide case management functions, compared to only 7.2% in 2007-8. This represents about a 750% increase over the past 13 years.

### Clinical Load Index

For the third year in a row, the Clinical Load Index (CLI) was calculated for each center that provided the necessary data. The CLI seems promising as a method for evaluating and comparing counseling center clinical resources. The average CLI for 2019-2020 was 114.0.

### Session Limits

54.4% of centers do not have a session limit, another 45.1% have a flexible session limit (exceptions made), and only 0.5% have a “hard” session limit (no exceptions). Of those with a stated limit, 25.9% of centers have a limit of 12 sessions, 22.4% have a limit of 10, and 21.0% have a limit of 7 or less.

#### Frequency of Appointments

41.5% of directors report that most clients are seen for weekly appointments. 44.7% report that **most** clients are seen, on average, every 2 weeks, and 12.3% report that **all** clients are seen every other week or longer.

#### Wait for a First Appointment

The average wait for all clients for a first appointment was 4.0 business days. The average wait from the time of students' triage appointment to the time of their next clinical appointment was 7.0 days.

#### Counselors Embedded in Other Campus Locations

21.3% of centers have counselors embedded in other offices on campus. Of those with an embedded counselor, centers reported having 75.2 weekly hours in a school/college at the university, 35.1 weekly hours in health services, 35.5 weekly hours in residence halls, 23.5 weekly hours in athletics, 18.9 weekly hours in under-represented students' offices, and 31.0 weekly hours in other locations.

## CENTER INFORMATION

### Highlights

- Centers with a lower Clinical Load Index are more likely to see most clients on a weekly basis.
- Centers are fairly evenly divided between those who see most clients on a weekly basis (41.5%) and those who see most clients every other week (44.7%).
- More than half of centers have case manager(s) but larger centers are more likely than smaller ones to have these positions.
- 45.7% of centers report using some type of Stepped Care model.
- 21.3% of centers report having one or more counselors embedded at other campus locations, most often in the Athletic Department.
- Embedded counselors in schools or colleges seem to provide the most available hours relative to other locations.
- Larger centers are more likely than smaller ones to have embedded counselors.
- With the exception of the 35,001-45,000 group, median and mean wait times appear close to each other, suggesting that there may be a similar flow or management of demand for the schools in each category.
- For schools with session limits, the average limit is 12 sessions.

### Institutional Division

#### Percent of Centers Residing in Different Institutional Divisions

Division	# of Centers	Percent
Student Affairs / Student Development / Student Life	350	84.8%

## CENTER CLINICAL SERVICES PROVIDED

### Highlights

- There is a lot of variability in the percentage served across school size, as well as within school size, except for schools in 35,001-45,000 range.
- The average number of sessions per client does not differ for community colleges as compared to four-year and graduate institutions.
- Mean rates of clients first seen for a crisis appointment are relatively consistent across school size.

### Percent of Campus Served by Counseling Services

## CENTER CLIENTS

### Highlights

- Anxiety and depression remain the most frequent presenting concerns for clients.
- About 17% of students sent to the hospital for mental health concerns are done so on an involuntary basis.

## Presenting Problems of Clients

### Mean Percent of Clients with Specific Presenting Concerns

Presenting Problem	# of Centers Reporting	Mean Percent
Anxiety	248	59.2%
Depression	247	46.5%
Stress	199	42.8%
Family	218	27.4%
Relationship problem (e.g. roommate, friend, romantic partner)	230	25.2%
Academic performance difficulties	236	25.1%
Sleep disturbance	201	16.6%
Social isolation / loneliness	187	16.4%
Adjustment to new environment	213	16.1%
Trauma (NOT including sexual assault)	198	15.4%
Eating/body image	232	13.0%
Suicidal thought/behaviors	221	11.7%
Career concerns	188	10.6%
Grief or loss	228	10.6%
Sexual abuse or assault or misconduct (survivor of)	213	7.8%
Non-suicidal self-injury	205	6.4%

NOTE: The number of centers reporting data varied for each presenting problem area. The reasons for this are varied. Some centers collect this data from clinician rating of concerns while other centers collect this data from client self-report. Another reason for the variability is that many centers did not report any data on these variables, either because they do not collect such data or because the manner in which the data is collected does not allow for easy tabulation.

## Academic Impact of Counseling Services

### Does Counseling Help Academic Performance?

	# of Centers Reporting	Percent
Centers that do not ask clients this question	205	55.0%
Centers that do ask clients this question	168	45.0%

## CENTER STAFF

### Highlights

- More centers gained staff than lost staff.
- Nearly half of centers reported no turnover, with smaller schools seeming more likely to report no turnover or only one position turning over.
- Promotion and retirement combined (both forms of natural career progression) are the most common reasons for staff leaving; however, these only account for about a third of cases. Other reasons are at play in the majority of staff turnovers, with most loosely connected to the position being a poor fit in some way.
- The majority of center staff are white-identified, heterosexual, cisgender females, but may be more diverse in their identities than Directors.

## COVID IMPACT

### Highlights

- Most Centers report using a HIPAA compliant platform.
- Very few tele-mental health services were provided prior to the pandemic. Tele-audio was more common prior to the pandemic, with a clear shift to greater use of tele-video during the pandemic.
- While in-person sessions were not the norm during the pandemic, there were schools that were still offering them. There does not appear to be a clear pattern connected to school size.
- Just over half of schools reported providing services to students out of state during the pandemic.

## INSTITUTIONAL INFORMATION

### Highlights

- Most of the Directors responding to the survey represent centers in the United States and within or close proximity an urban setting.
- 34.3% of undergraduate students live on campus. The percentage is higher for schools with 10,000 students or less.

### Country in Which College or University is Located

Other benchmarking groups to which your institutions belong*	73

\*The Other category included a wide range of responses, encompassing 82 unique organizations/groups. Themes are listed here. The number in parentheses indicates the number of centers listing an organization in the thematic area. Themes included: institutional accrediting bodies (26); broad national organizations supporting student affairs professionals, student health, or professional practice (19); general state or regional higher education associations (17); consortiums, associations, or councils for specialty-focused schools or colleges (16); discipline-specific accrediting bodies (11); organizations supporting director-specific identity or role (7); national, state, or regional associations for independent colleges and universities (7); religiously-affiliated associations or organizations (6); country-specific national, regional, or mission-specific organizations (5); collegiate sports conferences (5); organizations supporting campus-focus population or trans-regional location (3) and one (1) organization that did not fit into any of the foregoing themes.

## DIRECTOR INFORMATION

Some of the data gathered in this section is from the Annual Salary Survey that was distributed to counseling center directors separately. Those tables are noted with an asterisk.

### Highlights

- The majority of directors are White-identified, heterosexual, cisgender females.
- 56.1% of directors have been in their role for 1-5 years. Only 14.3% have been in their role for 11 or more years.
- Directors tend to wear multiple hats and often oversee other areas besides counseling services, most frequently psychiatry services.

### Director Racial/Ethnic Background

Racial/Ethnic Identity	Percent
American Indian / Native American	0.2%
Arab / Middle Eastern	0.2%
Asian / Asian American	5.8%
Black / African American	8.9%
Latinx	4.3%
Multiracial	1.4%
White / Caucasian	77.9%

## SUGGESTIONS FOR NEXT YEAR'S SURVEY

Suggestions for Next Year's Survey
We had worsening outcomes for our student survey so I'd like to know if that is a trend possibly associated with COVID-19. Also, I'd like to know different creative strategies that counseling centers used to meet mental health needs of students who are out of state.
Two suggestions: 1. Make a correct distinction between embedded and satellite counselors. 2. Consider sending, under separate cover, the different categories used to measure data in the survey so Directors can apply those categories to measurements being done in our Electronic Health Records.
The survey needs to be significantly shorter. I suspect that one of the reasons people don't complete it is because it is too long.  The ability to drag back to a particular item would be great, rather than having to hit the "Prev" button numerous times to get to the ones I skipped.
Tease out the embedded counselors question. Athletics has 3 embedded counselors, but they do not report to the SCPS Director.
Send a 1-2 page checklist of all the data you'll want for next year so we can set up reports now that track it all. I had to look in multiple locations to get all the answers. Also, the last section that asks about Veterans and Fraternities doesn't clarify if I should leave it blank or put 0. We don't track Fraternity/Sorority involvement. Thanks!
Question about which EMR/EHR system is used; I think this will be helpful when centers do RFP's. Without this data, a center could have less ability to advocate for a product that works for us than for a product that works for their student health when there is a pressure to integrate records. Being able to state which products are widely used and liked is important. Also, would suggest a question regarding how much the director likes the EMR/EHR System/how it works for their needs and pros and cons. However, I know that the goal of the survey is to minimize the questions. Thanks
Please ask for percentage based numbers rather than absolute numbers for everything. It is hard to come up with exact figures when your institution does not have an EMR system. Lastly, the question concerning psychiatry services, there wasn't a space to indicate that we ONLY have a telehealth psychiatrist that runs through our health center. Not every institution is fortunate to have one physically on their campus. Please think of smaller institutions without a lot of resources when forming some of your questions. Thanks so much!
more categories for LGBTQ+ students (for students who identify as pansexual, queer, asexual, etc.)
It would be helpful if the SDS could gather the same demographic information that is asked for on this survey. Can we advocate for that to happen?

It would be great to have a training on this at the conference so we learn how to run these reports better and ask the questions that would be helpful to the survey. Thank you so much for all this work.
Instructions on how to get some of this data from Medcat (particularly client demographics, presenting problems, and crisis information).
In Japan, our school year begins in April and ends in March. So, it is hard to answer to many questions of the survey.
I was unable to provide many stats as my staff stopped using Titanium from March 15-early June and the notes data we have are not completely reliable. We were scrambling and accurate data collection unfortunately was not a priority. Our center also works with student in non-clinical interactions so it is difficult to ascertain accurate numbers without software.
I really appreciate the changes made! Your team has streamlined the process. I especially appreciate the clarity of instruction, provided examples, and specifics on how to run the Ti report to garner the requested information. Thank you! In SurveyMonkey is there a way to return to, or search, for a question other than Prev and Next options?
I appreciate being able to complete the survey in several sittings. It would help to have a site navigation menu so that I can go directly to questions I skipped. Clicking through each page was time consuming and frustrating. This is my first time completing this survey, so I don't know if I will be able to save/print my responses once I click done, but that would be a nice option. Thank you!
I appreciate all the changes are done in the past few years to reflect feedback especially from universities located outside the U.S. Below are my further feedback: 1. It is difficult to define some demographic information such as race and ethnicity in universities outside of the U.S in general and in particular, I am not sure how to interpret "international students" for our school. A few American students would be considered international on our campus. However, not sure if this what is intended for this survey. I wonder if this can be further clarified in the instructions for the future. 2. Questions about "telemental health" items asked "How many sessions were provided." It seems the intention was to capture how many sessions were attended. This can be changed in the future surveys maybe.
I am INCREDIBLY grateful for this survey every year and this year in particular. Thank you to every survey team member for you time, talent, and making survey really do-able. I appreciate what I learn from this. One challenging question that I left blank was percent change of clients this academic year to last as we saw an increase in clients/sessions prior to COVID when comparing past 5 years to that time period in March although overall I would say we saw decrease when looking at entire academic year so I left that blank but I think looking at that time in particular may be useful and appreciate recent short survey pulling out data for this fall given COVID. Again, thank you!
Give option of dual degrees, or multiple choice option for those of us with multiple masters.
For sexual orientation, please add the following categories: queer, pansexual, and asexual (at least queer if you are going to add only one). And please get rid of or clarify what you mean by self-identify
For Sexual Orientation, add Questioning and Self-Identify as categories.

Counseling Centers using a psychoeducational or pre-counseling workshop such as RIO or Pathways. Those who are providing single session only for routine clients during high demand times (e.g. end of semester)

Consider Canadian responses and memberships

1. It would be less cumbersome to allow centers to use their own reporting year so it's not a complete duplication of effort from their annual report. 2. Many of the questions it says to look up unique clients in Ti under appt statistics, but many centers have multiple codes for say individual therapy so adding those would be misleading, and you really have to find that under the monthly statistics report.
